Please keep in mind that when you stand, you block the view of other fans behind you. STATE FARM STADIUM FACTS AND FIGURES

FIELD TRAY

State Farm Stadium features a unique rollout natural-grass playing field, contained in a single tray measuring 234 feet wide by 403 feet long and weighing a hefty 18.9 million pounds. The first completely retractable field in North America, it will be positioned inside the stadium on game days to offer the preferred natural-grass playing surface for football and outside the stadium the remaining days of the year to receive the needed sunlight and water to grow. A total of 462 steel wheels riding on 13 parallel steel rails are used to slide the field tray in and out of the facility. Of those 462 wheels, only 76 of them are powered by a one-horsepower electric motor to move the field tray from outside to inside in roughly 70 minutes. The flexibility of this unique design allows State Farm Stadium to serve as a true multi-purpose venue featuring a 164,000 square-foot event floor.

RETRACTABLE ROOF

The roof at State Farm Stadium is comprised of two 180-foot long by 240-foot wide retractable panels that will remain closed to allow for air conditioning during the hot summer months and then open during the cooler months to take advantage of the Valley's abundant sunshine. The fabric roof will allow light to fill the stadium and provide an open, airy feel even when the roof panels are closed. The roof system is designed to close in approximately 12 minutes.

SPORTSMAN'S PARK

The area that surrounds and encompasses State Farm Stadium is known as Sportsman's Park. The 160-acre footprint includes carparks, grass areas and an abundance of trees and other landscape native to the area. On-site parking accommodates 14,000 cars as part of an innovative site plan designed to create a truly unique tailgating experience for fans. A tree-lined expanse of grass, the Great Lawn extends west from 95th Avenue to the Loop 101. The lawn stretches over 1,000 feet and 4.61 acres total, which is designed for use by fans while tailgating at games or to use during other activities outside the stadium.

TILLMAN PLAZA AND MEMORIAL

The Pat Tillman Memorial is located in a prominent, but reflective area just off the northwest section of the stadium plaza, which is also known as Tillman Plaza. Both the plaza and memorial are open for viewing by fans during their visit to the stadium. The Memorial was conceived and designed by Peter Eisenman and Michael Dollin, the same designers who designed Sportsman's Park, the 160-acre parcel that surrounds State Farm Stadium. The Memorial consists of a bronze statue of Pat in a pose familiar to all Cardinals fans. The statue was sculpted by Omri Amrany, an expert in this art form. Opposite the statue is a 60 foot diameter negative edge reflecting pool. The pool has a low seat wall that allows fans to experience the Memorial and creates a fitting remembrance of the Arizona State Sun Devil, Arizona Cardinal and U.S. Army Ranger that lives on in our hearts and memories.

EMERGENCY EVACUATION PLAN

All fans at State Farm Stadium should familiarize themselves with the emergency evacuation plan. The most important thing you can do in the event of an emergency is be prepared. The first step is to be familiar with the closest emergency exits to your seat location. It is always a good idea to identify two emergency exits should one be unavailable due to the nature of the emergency. Families and groups should pre-designate a meeting location outside of the stadium in the event of an evacuation. If you have any questions about the location of emergency exits please refer to the stadium diagrams in this guide or contact a guest service or security staff member for assistance.

It is important to remain calm and follow the instructions of stadium staff during an evacuation. Please remember, for the safety of all, everyone should leave in an orderly manner.
