

Modern Office Methods Office Technology Makeover Sweepstakes

Modern Office Methods (MOM) is proud to announce the **Office Technology Makeover Sweepstakes**—a chance for one deserving organization to receive a full office and network security transformation. This initiative supports our mission of helping local businesses stay secure, modern, and equipped to serve their communities for years to come.

How to Enter

Organizations must submit a **written nomination** that explains:

- **Why cybersecurity matters** to their long-term mission and ability to give back to the community.
- **How a technology makeover** would strengthen their capacity to serve, expand, and grow.

The winner will not only receive an office technology and security overhaul but will also share feedback and insights on how these improvements help safeguard their mission.

What We're Looking For:

Impact on Mission

- Show how an office makeover will directly help your organization serve the community better.
- Examples include: modernizing your workspace to expand services, improving technology to support underserved populations, or protecting client data to maintain trust.

Demonstrated Need

- Describe the condition of your current workspace: outdated, unsafe, or inefficient systems.
- Share your budget and resource limitations that prevent upgrades on your own.

Community Reach & Storytelling

- Highlight how many people your organization impacts each year.
- Share a compelling story about your mission—one that resonates with both Bengals fans and MOM's commitment to cybersecurity and managed services.

Alignment with Values

- Preference will be given to organizations focused on education, safety, technology, youth, or community development.
- Demonstrate how secure technology is essential to your growth and impact.

Sustainability of Impact

- Show that the improvements will have lasting benefits, not just a one-time effect.
- For example, safeguarding data, streamlining workflows, and enabling long-term scalability.

Why This Matters

At MOM, we believe that **technology and security are the backbone of community impact**. By helping organizations modernize and protect their operations, we ensure they can continue making a difference—safely, efficiently, and sustainably.

Award Details can include the following options:

1. Up to \$10K in office equipment - winner must purchase a discounted maintenance agreement through MOM.
2. \$5K external network vulnerability assessment by Obviam
3. Year Subscription to security awareness training up to 10 users provided by OptimizedIT
4. Free dark web scan conducted by OptimizedIT
