

US100 Unisex T Shirt Size Guideline

Our size chart defines the actual garment measurements for each size. What that means is that if your chest measures 42 inches around and you choose a tee with a 42 inch measurement, the shirt will be too small. Take your chest measurement with a tape measure snug but not tight around the largest part of your chest and add 3-4 inches to determine the correct size to order. If you are between two sizes choose the larger size for a looser fit or the smaller size for a tighter fit. If in doubt on what size to order we recommend ordering a larger size rather than a smaller size.
