Tech Internship and Entry-Level Opportunities

Fanatics is a leading global digital sports platform, complete with offerings that excite fans and maximize the reach and presence for partners across the entire sports ecosystem. Come help us build a company the world has never seen before!

We are first and foremost a technology company. We build innovative fan experiences through highly analytical, forward thinking, and open-minded collaboration. We are passionate about evaluating and finding the right tech for the jobs at hand, and we get excited about building solutions for modern challenges.

Internships begin in late May and run approximately 12 weeks.

What you'll be doing:
- Understand and implement industry-standard technology patterns in conjunction with heavy performance optimization in services.
- Act with a team in the development of cutting-edge applications and services, as well as collaborating with other business units.
- Share technical knowledge with existing team.
- Participate in a small, experienced, energetic team on a rapid, agile development schedule

What we're looking for:
- Pursuing a degree in Computer Science or equivalent experience
- Familiarity with agile development practices
- Strong communication and analytical skills, including the ability to navigate ambiguity while working well with disparate teams
- Ability to continuously deliver results under tight deadlines
- Ability to approach work with an open, flexible outlook focused on innovation
- Must be a creative thinker able to solve complex, highly technical problems
- Ability to work in a challenging, fast-paced agile environment
- Desire and ability to work as part of a team
