

RAVENS IN OUR COMMUNITY

HS COACH OF THE WEEK

Thursday, Sept. 10, marked the beginning of the Ravens RISE High School Coach of the Week initiative. Now in its 19th year, the program strives to honor high school coaches who have made a significant impact on their student-athletes. Ed Dolch, head football coach of South River (Edgewater, Md.), was named the first recipient of the award in 2015. Each winner will be in attendance at the Ravens-Chiefs home game on Dec. 20 for an opportunity to be named the 2015 Ravens High School Coach of the Year. In addition, each coach will receive a donation to the school's football program and an award from Ravens head coach **John Harbaugh**.

2014 Coach of the Year Winner, Thomas Browne

HS SHOWDOWN

During each week of the regular season, the Baltimore Ravens will recognize one local high school football game as its Ravens RISE High School Football Showdown. In conjunction with *The Baltimore Sun*, a voting poll will be established each week to help select which matchup will receive a visit to the game from Ravens Cheerleaders and mascot Poe, as well as a monetary donation for both schools' respective athletic programs. This year's first Showdown featured the Westminster Owls at the Oakdale (Ijamsville, Md.) Bears on Friday, Sept. 11, with Oakdale winning by a score of 42-10 (teams pictured below).

Oakdale Bears - 42, Westminster Owls - 10

SEATS FOR SERVICE

The Baltimore Ravens continue their tradition of honoring our country's service members through this season's Seats for Service program. In conjunction with Northrop Grumman, the Ravens will honor a group including, but not limited to, representatives of the military, first responders, veterans and wounded warriors. The group will receive pre-game sideline passes and tickets to a home game in five specially-designed seats. A sixth seat will remain empty to represent Prisoners of War (POW) or Missing in Action soldiers. In addition to these tickets, all honorees receive five tickets to the Military Bowl, presented by Northrop Grumman in Annapolis on Monday, Dec. 28.
