

Ravens Training Center Garden

2025 RECAP

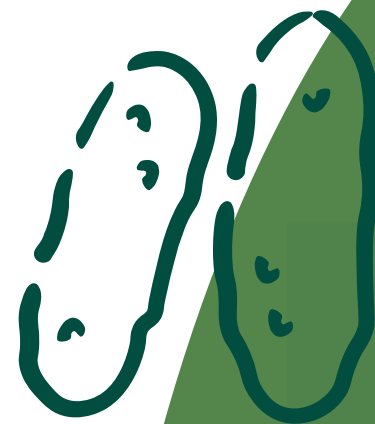

The first season of the patio garden at the Baltimore Ravens Training Center was a success! Situated on the second-floor patio overlooking the training fields, this compact garden produced over 120 pounds of fresh vegetables, from colorful rainbow chard to sweet peppers and eggplant. Totalling over 1,200 servings, the harvest was cooked up in the cafe to nourish the team. We are looking forward to bringing even more nutritious vegetables to the Baltimore Ravens Training Center next season!

your 2025 farmer,

Nadine
