

2021 SCHEDULE PREDICTION GAME

Below is the list of teams the Chicago Bears will play during the 2021 regular season. Cut out the opponents and attach them to the second page based on your prediction of when we will play that team. Once completed, compare your prediction with your friends and family. Turn the challenge into a family game by scoring each prediction with the following point system:

5 Points = Predicted the match up and week correct

1 Point = Prediction is within one week of the correct match up (before or after)

The person with the most points is the winner.

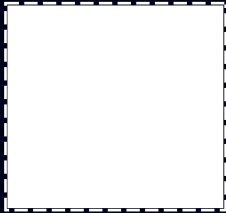

Stay tuned for the official release of our 2021 schedule!
