

HAND PRINT SPIDER

What you need

Orange construction paper

Black construction paper

Googly eyes

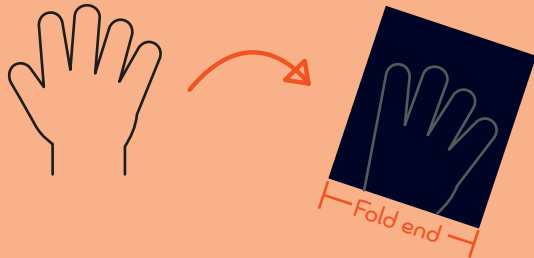

Black glitter glue

Glue sticks

Instructions

1. Fold the black paper in half twice.
2. Trace your child's 4 fingers (skip the thumb) on the paper and leave about 1/2-inch from where the lowest cutting point will be. Then, cut out the tracing to get your spider.

3. Draw spider webs on your orange construction paper with a pencil or a black pen. Add two web lines coming down for where you want to attach your spider handprints to.

4. Trace your web lines with the black glitter glue and allow the glue to dry overnight.

5. Now glue on your spider handprints! Add your googly eyes and you're done!
