

The Vikings Museum, operated by Legends, is committed to providing a safe and healthy workplace for all our workers and fans. Based on the COVID-19 pandemic, Legends has reimagined its workspace and the fan experience to allow for a safe and enjoyable environment. In conjunction with the Minnesota Vikings and recommendations from local, state, and federal authorities, Legends has developed additional policies and procedures to add to its existing high standard personal safety programs so that fans and workers are safe.

We are doing our part by:

- Conducting daily health assessments of all workers through a multi-step process
- Restricting capacity inside the museum
- Encouraging prepaid, online admission sales and eliminating cash transactions for a touchless entry
- Adding plexiglass barriers at the lobby desk
- Providing complimentary gloves for all guests to enjoy the museum interactives
- Adding new hand sanitizer stations throughout the museum
- Hourly sanitizing of all major touch points including handrails, door knobs, counter tops, bathroom faucets, elevator buttons and other highly touched surfaces
- Ensuring all museum staff are equipped with PPE and disinfectant
- Dedicating staff to sanitation and cleanliness
- Continuing professional after hours sanitation and disinfectant services
- Designating separate doors to enter and exit the museum
- Designating foot traffic patterns to facilitate social distancing
- Placing wayfinding signage and floor decals to eliminate congestion and cross patterns of traffic
- Placing social distancing reminders throughout museum
- Having hands free soap and air dryers in all restrooms
- Posting handwashing recommendations from the CDC in all restrooms
- Providing our staff with mandatory trainings to understand the company's policies and procedures as it relates to subjects such as personal safety, fan safety, and COVID-19 protection

We ask you to do your part by:

- Purchasing museum admission tickets online before you arrive
- Wearing a mask as mandated by the state
- Not entering the museum if you feel ill or show any symptoms of COVID-19
- Practicing social distancing by staying six feet apart from others

- Using the hand sanitizing stations throughout the museum frequently
- Washing your hands frequently
- Keeping food and beverages out of the museum
- Following additional policies as posted throughout the museum
- Following direction from museum staff and security

We will continue to update our procedures as we remain diligent and adaptive to the ever-evolving Covid-19 pandemic.
